Fantastic, Helpful Guide

By Christina Console

For several years, my daughter has been asking for piano lessons. Shamefully, I admit that I was intimidated on getting her started in this world. As a single mother, not only did I not have the space for a full sized piano or the money, but also the time and research that went into this endeavor seemed daunting.

After reading "How To Get Your Child Started In Music," there were no more excuses. The author laid out every single step in a detailed, concise manner that made the process a piece of cake. With this book, I found a neat keyboard for very little money, and she could also sing-along with the music that came with it. And my daughter can't close the piano books that the author recommended. They are so beautifully illustrated to keep her interest.

My daughter was thrilled with her new keyboard and lesson books and I also found the right piano teacher, all by following the author's checklists. She has been on her way. It is amazing to see my once shy daughter entertain her friends with her new musical skills on the piano. Her self esteem has taken off through the roof and her grades at school have even improved- and *that* is music to her mother's ears!
