This is the third, revised edition of Stuart Robson's highly successful guide to the grammar of the Javanese language, which is spoken by around 80,000,000 speakers on the island of Java. The book progresses from simple to more complex topics, facilitating a steady increase in language proficiency. Fresh examples have been added, as well as a section entitled "How Do You Say It In Javanese?" arranged under 120 headwords and taking the viewpoint of speakers of English wanting an equivalent to an English idiom. There is an introduction and a note on the language levels of Javanese, important for social interaction. The book will be of interest to students of Indonesian studies who want a deeper knowledge of communication on the island of Java, researchers considering fieldwork in Java, linguists making comparative studies of Indonesian languages, and outsiders undertaking employment in Java. Not a very useful book.

By Richard Sproat

This has to be about the weirdest pedagogical language text I have ever seen. It presents the grammar in a completely unsystematic way. It has very few full examples, no dialog examples, no lists of vocabulary except for a "how do you say this in Javanese" section at the end of the book. Yet this book is characterized as "highly successful", and is evidently in its third edition, so I suppose I must be missing something.
