TERRESTRIAL ECOSYSTEMS BY JOHN D. ABER, JERRY M. MELILLO PDF

Covering the complexities and interconnected nature of the world, as well as the impact of mankind on the environment, this interdisciplinary book presents a holistic view of ecosystem function and is designed to help students understand and predict the environmental future of the Earth. The authors provide a complete view of the environment--from the Taiga Forests of interior Alaska to the desert plains of the Serengeti. While retaining the previous edition's basic four-part structure, the authors have reviewed every topic (and consulted the recent literature in each case) in order to present the most complete and accurate picture of the state of ecosystem studies today.

buy the new edition

By A Customer

This is a great book but you should buy the second edition (hardback) which is more up to date and has color artwork in places.

0 of 0 people found the following review helpful.

Awesome book, should be cheaper and easier to find

By Alice

This is a great book. I am in a Natural Resources graduate program and got this to supplement an ecology course I am taking. It is very thorough and well-written, with tons of visuals. I wish the publishing company would make it a little easier to get this book.
